TRADEIFY 24/7 · NEW PRODUCT

Limitless Plan

How the plan works, every rule from evaluation to live capital, the news trading rules, and the key messages for marketing.

1 step
10% target. Passes automatically. Funded instantly.

5% static
Max loss that never trails, in evaluation and funded.

No caps
Payouts once a day, any time, with no payout caps.

75% split
Plus 10% from our share into the trader's A-book fund.

$100K → live
$100K in payouts builds a $10K fund. That unlocks live capital.

Hyperliquid
Markets, fills and liquidity referenced to Hyperliquid.

EVALUATION

One step to funded

One plan in four sizes. Traders build their account with two checkout choices and an optional leverage boost.

Core rules

Sizes	$5K, $10K, $25K, $50K
Profit target	10% of starting balance
Max loss	5% static. Floor never moves.
Time limits	None. No minimum days.
Measured on	Equity, including open P&L
News	No restrictions in evaluation

Checkout choices

Daily loss limit	None, or 3% from start-of-day equity. Resets midnight ET. Hard breach. Carries into funded.
Eval consistency	None, or 50%. Best day max 50% of total profit at pass. Extends the target, never fails the account.
Leverage boost	+10% on price. Doubles leverage in evaluation and funded.

NEW

The evaluation passes automatically

When equity hits the target and any consistency rule is met, the account passes on its own. No request and no manual review. The funded account is activated in real time, so the trader can start trading funded straight away.

The only exception: a pass that would take the trader over a funded allocation limit goes to an automated review, decided within 30 minutes.

Rules in dollars

Size	Target	Max loss	Fails at	DLL	Min payout
$5K	$500	$250	$4,750	$150	$100
$10K	$1,000	$500	$9,500	$300	$100
$25K	$2,500	$1,250	$23,750	$750	$250
$50K	$5,000	$2,500	$47,500	$1,500	$250

Leverage

Market	Standard	Boost
Indices	20x	40x
Gold	10x	20x
Oil	5x	10x
Crypto majors	10x	20x
Total exposure	20x	40x

All assets drop to a 5x max during funded news windows. See section 4.

PRICING

Four versions, four sizes

Sale prices are what the buyer pays after the code. The struck price is grossed up so about 30% off lands on the sale price.

Standard leverage

Version	$5K	$10K	$25K	$50K
No DLL, no consistency	~~$79~~ $59	~~$159~~ $114	~~$459~~ $325	~~$969~~ $679
No DLL, 50% consistency	~~$79~~ $56	~~$149~~ $108	~~$439~~ $309	~~$919~~ $645
3% DLL, no consistency	~~$39~~ $29	~~$89~~ $65	~~$249~~ $175	~~$499~~ $349
3% DLL, 50% consistency	~~$39~~ $28	~~$89~~ $62	~~$239~~ $166	~~$469~~ $332

With leverage boost (+10%)

Version	$5K	$10K	$25K	$50K
No DLL, no consistency	~~$89~~ $65	~~$179~~ $125	~~$509~~ $358	~~$1,069~~ $747
No DLL, 50% consistency	~~$89~~ $62	~~$169~~ $119	~~$489~~ $340	~~$1,009~~ $710
3% DLL, no consistency	~~$49~~ $32	~~$99~~ $72	~~$279~~ $193	~~$549~~ $384
3% DLL, 50% consistency	~~$39~~ $31	~~$99~~ $68	~~$259~~ $183	~~$519~~ $365

-5%
Adding 50% eval consistency takes 5% off the price.

~48%
Blended payout ratio in the unit economics model at these prices.

$325
$25K, no DLL. Vest lists $375. MFP Elite lists $500 ($350 on promo).

Competitor reference ($25K, list)

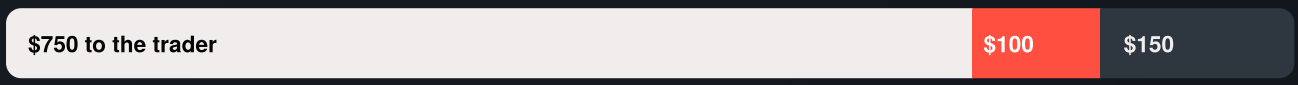

Plan	Rules	Price
Limitless, no DLL	10% target, 5% static, no DLL	$325
MyFundedPerps Elite	10% target, 5% static, no DLL, 80/20	$500
Vest Markets 1-Step	10% target, 6% static, no DLL, 80/20	$375
Limitless, 3% DLL	10% target, 5% static, 3% DLL	$175
MFP Signature / Vest 1-Step	10% target, 6% static, 3% DLL	$225 / $210

FUNDED

Limitless in the funded account

Same 5% static floor. Payouts once a day with no caps. A share of every payout builds toward live capital.

Where every $1,000 withdrawn goes

- 75% paid in cash
- 10% into the A-book fund, from our share
- 15% kept by Tradeify

Funded rules

Max loss	5% static. Floor never moves.
Withdrawals	Withdrawing all profit resets the cushion to 5%. Profit left in at approval becomes locked buffer.
Daily loss limit	Carries over if bought
Consistency	None on funded
News	Restricted windows. See section 4.

Payouts

Frequency	Once per day, requested at any time, 24/7
Caps	None. No per-request or lifetime cap.
Minimum	$100 gross on $5K and $10K. $250 on $25K and $50K.
Conditions	Account must be flat. Trading locked while pending.
Split	75% cash plus 10% to the A-book fund

Funded allocation

$100K
Max active funded on Limitless, any mix of sizes.

$300K
Max across all Tradeify 24/7 plans. Each plan has its own $100K.

30 min
Automated review when a pass would go over a limit.

15
Max funded activations per rolling 30 days.

Allocation counts starting account size. Profits, losses and payouts don't change it. A failed or closed funded account frees its space.

TRADING RULES

News trading rules

What traders can and can't do around high-impact releases.

EVALUATION

No restrictions

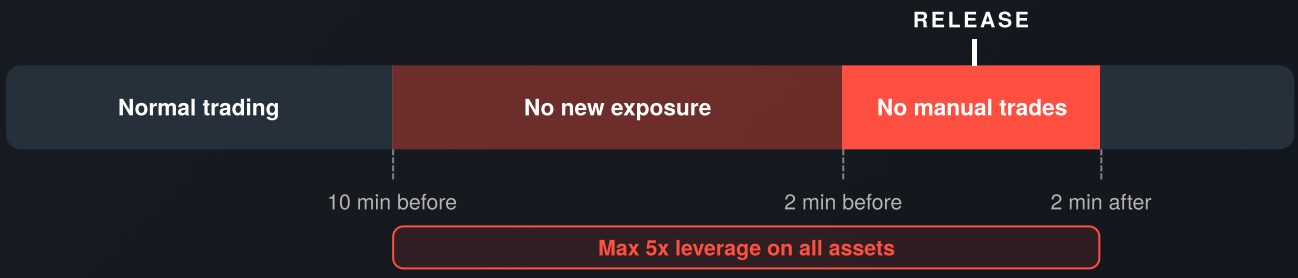

Open, hold and close through news however you like during the evaluation. Normal leverage applies.

FUNDED

Restricted windows and 5x max

The windows below apply to every restricted event on a funded account. Max leverage drops to 5x on all assets for the whole window.

The windows on a funded account

A position opened more than 10 minutes before the release can be held through, as long as it is at or under 5x leverage when the window opens.

MORE THAN 10 MIN BEFORE

Hold through

Opened more than 10 minutes before? Hold it through the release. Reduce to 5x or less before the window opens.

10 MIN BEFORE → 2 MIN AFTER

No new exposure. 5x max.

No new positions, no adding, no reversing. Nothing that increases exposure in an affected market. Leverage capped at 5x on all assets.

2 MIN BEFORE → 2 MIN AFTER

No manual trades

No manual executions at all. Reduce or close before this window if you want out.

Restricted events

Any event marked "High Impact" or red-folder on our economic calendar, including:

FOMC decisions and statements	CPI	PPI	Non-Farm Payrolls	GDP	Retail Sales
Unemployment / Employment	PCE inflation	ECB rate decision	BOE rate decision	BOJ rate decision	Any "High Impact" red-folder event

Stocks and equity perps: company earnings announcements are restricted too, whether they land before the open, after the close or during the session.

LIVE CAPITAL

From payouts to live capital

Every payout builds a fund held for the trader. At $10K, it becomes the static drawdown on real, A-booked capital.

How the A-book fund works

1. **Fund builds with each payout.** 10% of every gross payout, from Tradeify's share. The trader still gets their full 75% in cash.
2. **Unlock at $10K.** That is $100K of gross payouts. One fund per trader, pooled across all their accounts.
3. **$50K of live capital.** The $10K fund is a 20% static drawdown. Run it as one account or split across up to 4.
4. **90/10 live split.** Real positions, A-booked. The trader keeps 90% of live profits.
5. **4-week cooldown.** Blowing a live account means 4 weeks before returning to live trading.

Worked example

Account	$50K Limitless
Typical payout	$750 gross (1.5%)
Each payout	$562.50 cash, $75 fund, $112.50 Tradeify
Fund target	$10,000
Payouts needed	About 134 at this size, or $100K gross across accounts
Live capital	$50,000 at 20% static DD
Split option	4 × $12,500, each with $2,500 DD

Risk to Tradeify

Live losses come out of the fund first. The fund is money Tradeify already set aside, so live risk is capped at what was put away.

TRADEIFY 247 ELITE PROGRAM

A-book only

Once a trader has been through the A-book cycle and we've learned how they trade, Tradeify can move them to A-book only.

Straight to A-book
Evaluations skip the sim funded stage. Passing goes straight to a live A-book account.

One version only
3% daily loss limit with 50% eval consistency.

Full price
No discount codes. Full list price.

A-book only price	$5K	$10K	$25K	$50K
3% DLL, 50% consistency	$39	$89	$239	$469

FOR MARKETING

Key messages

Lead with these four. Each has the proof point to back it up.

Limitless potential in the funded account. No payout caps.

Proof: no per-request or lifetime payout cap. Payouts once a day, any time, 24/7. Funded instantly when the evaluation passes.

Trade absolutely anything.

Proof: crypto, indices, commodities and equity perps in one account. Leverage up to 20x, or 40x with the boost.

Get the best fills and liquidity from Hyperliquid.

Proof: pricing and fills referenced to Hyperliquid's order book and its deep on-chain perps liquidity.

Earn up to $100K in payouts and build your A-book fund. Hit $100K and get $10K in static drawdown to trade live markets.

Proof: 10% of every payout goes into the trader's fund from our share. At $10K, the fund becomes a 20% static drawdown on $50K of live capital.

Before anything goes live

- "Up to $100K in payouts" can read like a cap next to "no payout caps". Suggested line: "Earn $100K in payouts and unlock live capital."
- "Trade absolutely anything" should match the instrument list at launch.
- Hyperliquid claims must match how fills work. Evaluation and funded accounts are simulated, so say fills are priced from Hyperliquid's book.
- Every asset should carry the standard disclosure: evaluation and funded accounts are simulated.
